PROFESSIONAL SUMMARY

Software Development Engineer with 1.5+ years of experience building end-to-end full-stack applications using React.js, TypeScript, Python, Node.js, and PostgreSQL. Experienced in developing reusable UI components, responsive interfaces, REST APIs, distributed backend services, workflow automation, AI-assisted solutions, and scalable cloud-native applications with a strong focus on performance, maintainability, and user experience.

EDUCATION

National Institute of Technology, Agartala <i>B.Tech in Electronics and Communication Engineering</i>	2020 – 2024 CGPA: 8.47
---	---------------------------

EXPERIENCE

JTR High Yields Agro Pvt Ltd <i>Software Development Engineer I</i> - Developed reusable React components and responsive administrative interfaces supporting multiple business workflows with configurable UI behavior across screen sizes. - Optimized frontend performance using lazy loading, memoization, efficient state management, and background file upload workflows to improve user experience and reduce unnecessary re-renders. - Integrated React applications with REST APIs, authentication, caching, and asynchronous processing for seamless end-to-end user workflows. - Designed distributed logistics and vendor management services integrating third-party shipment APIs, reducing response latency by ~75% through caching and optimized backend workflows. - Architected asynchronous workflow orchestration using message queues, durable workflows, and background processing for scalable backend execution. - Engineered PostgreSQL advisory-lock based inventory services ensuring transactional consistency during concurrent inventory updates. - Built secure multi-tenant backend services with JWT authentication, RBAC, dependency injection, ORM repositories, and RESTful APIs. - Developed OCR + OpenAI powered invoice automation pipelines integrating document processing, vendor matching, and asynchronous persistence.	06/2025 – Present
Corundum Technologies Pvt Ltd <i>Full Stack Developer</i> - Led end-to-end development of a ticketing and inventory management platform used by 20+ internal users, reducing issue resolution time by 40%. - Designed responsive React interfaces with reusable components, role-based dashboards, and mobile-friendly layouts. - Built REST APIs and PostgreSQL-backed backend services supporting approvals, inventory tracking, analytics, and operational workflows. - Implemented LDAP authentication, role-based authorization, and secure enterprise login flows. - Integrated Socket.IO to deliver real-time notifications and collaboration features, improving cross-team response time by 30%. - Delivered workflow automation modules reducing manual effort by approximately 60% while collaborating across frontend and backend development.	09/2024 – 05/2025

SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Redux, HTML/CSS, Tailwind CSS, Bootstrap, Responsive Design, Performance Optimization
Backend: Node.js, Python, Flask, REST APIs, JWT, RBAC, WebSockets, API Integration, Authentication
Databases: PostgreSQL, MongoDB, SQLite
Systems: Distributed Systems, Event-Driven Architecture, Workflow Automation, Asynchronous Processing, Caching, Concurrency Control, System Design
Cloud: Serverless Computing, Cloudflare Workers, Durable Objects, Durable Workflows
Tools: Git, Postman, ORM, Dependency Injection, Agile/Scrum

CERTIFICATIONS

Python Programming | Data Structures & Algorithms | C++ Programming
